Summary

- Expertise in particle transport simulation code (C++) with 8 years of experience.
- Experience in large-scale data analysis and algorithm software development.
- Innovative problem solving skills with the ability to interface original work with larger collaboration.

Experience

UC Berkeley — Post-doctoral Scholar   June 2018 — *Current*
- Supervisor for C++ software simulation/modeling of photon interactions with wavelength shifters.
- Data analysis lead for energy spectrum of radioactive isotope α decays.

UCLA — Post-doctoral Scholar   2016 — 2018
- Lead developer of precision α decay spectrum model to improve characterization of backgrounds in $0\nu\beta\beta$ decay searches.
- Mentor for 2 PhD students to simulate radiation shielding structures in C++ to mitigate γ/β backgrounds for next generation $0\nu\beta\beta$ searches requiring ultra-low radiation environments.

University of Hawaii at Manoa — Research Assistant   2009 — 2016
- Spearheaded development of a novel directional neutrino detection technology in scintillator and demonstrated with data for the first time that this can be applied to conduct indirect dark matter searches in scintillator. First ever physics application of neutrino directionaly in scintillator.
- Lead developer of detector simulation code (C++) to conducted case studies of neutron capture doping agents in solid scintillator. Simulation results were later used to oversee detector design and construction.

Skills

Software/Tools:	Geant4, ROOT, SolidWorks, AutoCAD, ComSol, Pads, Git
Programming Languages:	Proficient in C, C++, Python, Mathematica, Fortran, BASH, Matlab
Human Languages:	English (native), Japanese/Korean (trilingual proficiency)

Leadership

Mentor — *UC Berkeley, UCLA*   March 2016 — *Current*
- Advised 2 students with optical simulation code for current hardware project. Students are now undertaking independent research tasks and contributing original work.
- Taught weekly Geant4 physics simulation tutorials to 3 PhD-level students for a semester. Students successfully learned to take on independent projects.

Teaching Assistant — *University of Hawaii at Manoa*   2007 — 2009
- Planned coursework and taught 2 weekly physics laboratory curriculum for classes of over 20 students each for 3 semesters. Received especially positive reviews for clarity of explanation of material, and teaching style.

Education

PhD, Experimental Particle Physics   2016
GPA: 3.97/4.00, University of Hawaii at Manoa
Dissertation: High Energy Neutrino Analysis at KamLAND and Application to Dark Matter Search

Double BS, Physics and Mathematics   2005
GPA: 4.33/4.50, Sun Moon University, S. Korea
President's Award 2005, Award for Outstanding Academic Achievement – Samsung Corp.
